

**In the claims:**

Claims 1-40 canceled.

41. (Original) A method of obtaining immune cells from an animal comprising harvesting immune cells from an immune modulation device comprised of an impermeable biocompatible shell having an outer surface with plurality of pores of suitable size to allow the ingress and egress of immune cells and said impermeable biocompatible shell having an interior lumen, a biocompatible fibrous scaffolding being disposed within said interior lumen, said interior lumen having therein a quantity of antigen or chemotactic agent sufficient to provoke an immune response that was implanted within an animal time sufficient to allow immune cells to migrate into the immune modulation device.

42. (Original) The method of claim 41 wherein the harvested cells are reintroduced to animals.

Claims 43-52 canceled.
